Pursuant to Miss. - Ensure the safety of officers and civilians;
- Increase officer understanding of mental illness;
- Improve relationships with the community, particularly with mental health professionals, people with mental illness, and family members.

The CIT for Law Enforcement concept is based on a successful crisis intervention program that began in Memphis, Tennessee.

CIT is conducted by specially trained law enforcement personnel, mental health professionals, mental health consumers and family advocates. The training includes identification of types of mental illness, verbal skills for de-escalation of potentially violent situations, specifics on suicide intervention, and a mental health system overview.
